CardioSteroil Krill

30 Liquid Capsules

Krill oil is a rich oil made from a species of krill [Euphausia superba]. Three of the most important nutrients that make krill oil so special are: (1) omega-3 fatty acids with EPA & DHA, (2) omega-3 fatty acids attached (conjugated) to phospholipids, mainly phosphatidylcholine, (3) astaxanthin, a very potent antioxidant. Krill oil in liquid capsules ensures that the benefits of the Omega 3 and of phospholipids and the antioxidant effect of krill oil are preserved. CardioSteroil krill oil is more bioavailable thanks to the liquid capsules. CardioSteroil krill oil in liquid hard capsules is more stable than krill oil presented in softgels because unlike the softgel capsules, the hard ones are not porous.

Direction for use: 1 to 2 Capsules per day or as directed by your pharmacist or doctor. CardioSteroil Krill can be taken together with statins since it does not interact.

CardioSteroil Krill

40 Softgels

CardioSteroil Krill is a concentrate of krill and omega 3, 6, 9 fatty acids that are microencapsulated for a better stability in the softgel. The eicosapentaenoic (EPA) and the docosahexaenoic (DHA) acids help to regulate the lipid metabolism. The red color of the softgel is due to the astaxanthine that has a synergic effect in combination with the omega 3-6-9.

Direction for use: 1 to 2 capsules per day or as directed by your pharmacist or doctor.

Cardiosterol Omega 3/6/9

40/100 Softgels

Cardiosterol SLO reduces bad cholesterol (LDL) in blood up to 27% maintaining a correct level of LDL and a healthy heart. Omega 3-6-9 and Shark liver oil help to keep tissues and capillaries toned preventing atherosclerosis. Cardiosterol S.L.O softgels can be administered with statins.

- ✓ Helps patients keep a correct level of LDL and a healthy heart
- ✓ Can be administered with other pharmaceuticals as it has no interactions
- ✓ Decreases deposits on arterial walls and sugar levels
- ✓ Increases blood fluidity
- ✓ High quality Nordic sea fish oil
- ✓ Prevents atherosclerosis and coronary artery disease

Direction for use: 1 to 2 softgels a day with a big glass of water before the main meals. Indicated for patients who have borderline cholesterol levels, patients on statins, patients who are prone to a rise in cholesterol e.g after pregnancy, geriatric cases, consumers of fatty products or simply to maintain a healthy heart.

OMEGA 3
OMEGA 6
OMEGA 9
EPA - DHA
SHARK LIVER OIL

Cardiosterol Garlic & Co Q10

40 Liquid Capsules

Garlic and CoQ10 are very important components for the heart health and they act synergistically. Garlic helps to protect the heart and CoQ10 helps to energize it. Garlic reduces the oxidation of LDL cholesterol, which is one of the most important factors in the acceleration of atherosclerosis, and CoQ10 is responsible for transporting electrons in our respiratory chain. CoQ10 plays a crucial role in the energy production of the mitochondria in every cell. Heart cells contain twice as much CoQ10 than any other cell in our body and need more CoQ10 because of the high energy turnover and oxygen consumption.

- ✓ Prevents arteriosclerosis
- ✓ Eases high blood pressure
- ✓ Regulates the rhythm of the heart

Direction for use: 1 to 2 capsules per day or as directed by your pharmacist or doctor.
